Subject: Specific Data on Housing Needs to Help Create Measurable Objectives

United Way of Dane County has an "agenda for change" initiative related to increasing the supply of affordable housing. As a result, they have been reviewing research, doing community engagement, and collecting quite a wide range of data about affordable housing.

Through these efforts, United Way has compiled detailed information that provides baseline data about affordable housing throughout the county. This information can be used to help work group members create specific measures for housing objectives at upcoming work group meetings.

Please review the attachments for this data. If you are not able to open the attachments, they will be made available at the work group website soon: http://www.daneplan.org/workgroup_hed_updates.shtml
