Youth Centers provide a safe and supervised educational, recreational and social environment for 6th, 7th, & 8th graders between the hours after school and dinnertime. When these children have supervised activities during these hours they are less likely to be involved with drugs, alcohol, smoking and illegal activities. The results of studies clearly indicate that these programs are successful and will prevent involvement of participants in the criminal justice system thus reducing incarceration. Activities include community service, homework tutorial, positive social relationships and reduction in bullying behavior - which leads to gang violence.

Department:	Department of Human Services		
Program:	Public Health/Environmental Health		
Motion: (revenue/expenditure/text effect)	neither revenues nor expenditures be changed and that the following provision be added to Res. 141, 2006-07, Dane County Operating Budget Appropriations Resolution, "The department is directed to make an application to the state Department of Natural Resources to regulate the disposal of septage on land, and a septage monitoring program be created. The regulations will be administered by the Environmental Health Section of the Human Services Department, and by the successor entity when public health unification occurs, including evaluation of the soils at each site for the land application of septage and to license field disposal sites on an annual basis."		
Program/Personnel Effect:	This amendment creates a program for county monitoring and licensing of the land application of septage. Although this is a function performed by the Wisconsin Department of Natural Resources, staff shortages have made it difficult for the state to adequately fulfill this land and water protection activity. Statutes allow a county to submit an application to the DNR to regulate the disposal of septage on land, using site criteria and disposal procedures identical to DNR rules.		
Line Item Detail (not required for introduction, attach additional listing if necessary)			
Org	Object	DESCRIPTION:	Amount
Intent/Justification			
Due to staff shortages, the Wisconsin Department of Natural Resources is unable to exercise appropriate oversight of the disposal of septage on land. This amendment provides for the application to the DNR to have the authority to exercise oversight in this area delegated to the county, and provides for the establishment of a monitoring program, as allowed by state statute.
