

CONCERNS TO THE CURRENT NORTH MENDOTA PARKWAY PROJECT PROPOSAL

We, the undersigned, want to express the following concerns to the current proposal of the route for the North Mendota Parkway project:

1. The North Mendota Parkway should be south of Oncken Road, along an East-West line as much as possible, which would not bisect as many farms, homes and businesses as the current proposal south of Hwy "K" does. Environmentally and ecologically, the road would be better situated south of Oncken Road. The current proposals show the proposed routes running through environmentally sensitive areas.
2. Consistency with the route the Town of Springfield put on the most-recent North Mendota Parkway Map (see map attached).
3. Located southerly near lands slated for development. It would provide a stormwater buffer between the Dorn Creek area and the 691-acre development of 1200-1500 homes that T. Wall has proposed.
4. Preserving large operating farms, businesses and homes to the north and west, minimizing farm impacts and severances.
5. No existing driveways to accommodate.
6. This route would reduce wetland impact to about Zero.
7. This route would decrease roadway noise to adjacent residences.
8. It would also have the ability to capture traffic currently using local roadways. Consistency with travel desire lines. Ability to convert to a high mobility corridor. Ability to convert to a low mobility corridor. Ability to handle traffic volumes at U.S. Hwy 12 connection. Suitability of County Highways Q and M connections.
9. This area is at the top of the watershed for the Yahara chain of lakes. Impacts will affect down stream areas. Are you going to be the official who protects the resource?
10. More visionary!

Alignment 4

Alignment 13 Grade Separation for Relocated Pheasant Branch Road

- Provides connection for severed farm fields
- Allows Pheasant Branch Road to connect to County K.

Relocated Alignment 13

Provides Separation from Middleton Collector

Belfontaine

Alignments 12 & 13 could switch (eg west portion of Alignment 12 could connect with east portion of Alignment 13)

Both Alignments Reduce Wetland Impacts on County Q

Alignment 13

Relocated Alignment 13

- Provides stormwater buffer between agricultural uses and Dorn Creek
- Decreases number of farm severances

Both Alignments Preserve County Q corridor

- County Q continues to connect Middleton and Waunakee.
- County Q has connection to North Mendota Pkwy

Alignment 12 Travels Around Farm Operation

Both Alignments more closely mirror Middleton/ Springfield Agreement

Alignment 12 L Alignment 4

- Decreases road to adjacent re

Alignment 12
